

### Portfolio Objective & Strategy

This portfolio blends capital market, strategic and tactical asset allocation, and active risk management to attempt to develop and implement optimal portfolios for clients interested in cross asset class strategies to meet their investment needs. The Domestic Equity Portfolio seeks to capture the potential benefits of diversification and the advantages that can come from the dissimilarity in return patterns across different domestic asset classes. The Domestic Equity Portfolio is designed to make a series of low-correlated investments in a risk-controlled framework, and to deliver consistent added value over a full business cycle.
