

Portfolio Objective & Strategy

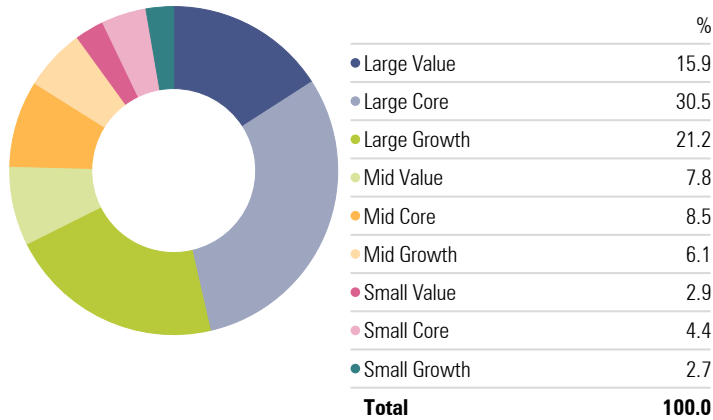

This portfolio blends capital market, strategic and tactical asset allocation, and active risk management to attempt to develop and implement optimal portfolios for clients interested in cross asset class strategies to meet their investment needs. The Global Equity Portfolio seeks to capture the benefits of diversification and the advantages that come from the dissimilarity in return patterns across different asset classes. The Global Equity Portfolio is designed to make a series of low-correlated investments in a risk-controlled framework, and to deliver consistent added value over a full business cycle.
