

Objective & Strategy

This strategy seeks to maximize long-term returns while providing diversification from domestic equity markets. The strategy intends to invest in the shares of non-US small capitalization companies that, in the manager's opinion, are temporarily undervalued relative to their peers. The strategy also has the ability to invest in broad-market ETFs. The manager evaluates companies for inclusion in the portfolio using a quantitative framework that incorporates a variety of factors. Foreign markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments.
